

CS193 — Week 3 Homework

Grading Rubric — 100 points

Each item is graded on the command used **and** the result. Award **full** credit for a correct command with the correct output/answer; **half** credit for the right approach with a minor error (wrong flag, off-by-one, header not skipped); **zero** if missing or unrelated. All answers come from the fixed data files, so they do not change over time.

Part A — Finding your way around (30 pts)

Item	What it tests	Full-credit answer	Pts
A1	ls piped to wc -l	24 log files	10
A2	find searches sub-folders	25 CSV files total	10
A3	find with a name pattern (TIP*)	3 files: TIP01, TIP02, TIP03	10

Part B — Pipes & filters (60 pts)

Item	What it tests	Full-credit answer	Pts
B1	head; recognizing the header	First line is the header row (column names)	10
B2	tail -n +2 to skip header, wc -l	24 stations	10
B3	cut -d, -f2	The station-name column printed	10
B4	grep -c	3 in White County	10
B5	<i>student-written</i> : cut sort uniq -c	Per-county counts (Cass/Clinton/Tippecanoe/White = 3; rest = 2)	10
B6	<i>student-written</i> : sort -t, -k6 -n head -1	Covington (Fountain), 80.0°F	10

Submission quality & reflection (10 pts)

Item	What it tests	Full-credit answer	Pts
—	Commands + outputs pasted, file named correctly	Readable week3_lastname.txt with each command and its output	5
—	Reflection sentence with reasoning	Names a top county (tie of 3 is fine) and cites sort uniq -c as the method	5

Bonus (optional, not graded)

Item	What it tests	Full-credit answer	Pts
—	Hottest station on average across all logs (awk + sort)	WHI03 (Reynolds, White County), ~76.6°F average	—

Total	100 points
